

## CAPABILITY STATEMENT

Passion. Performance. People.

**Juru Energy is an international energy consulting firm with distinctive qualities. We care a lot about our Clients' needs and how we can help them address their energy challenges. Our key focus is on power systems and renewable energy transition, covering technical, economic, financial, environmental, social and procurement disciplines.**

## ABOUT

---

Founded in 2015, Juru Energy is an independent energy consulting firm focused on developing countries. Our headquarters are based in **London, UK**. We also have a full office in **Tashkent, Uzbekistan** and operate in **Kazakhstan, Kyrgyz Republic, Tajikistan, Turkmenistan, Afghanistan, Azerbaijan, Cambodia** and **Maldives**.

As of 2020, Juru Energy employs 25 permanent staff who are highly experienced in implementation and management of our projects in the energy sector. In addition, we have a network of associates and external consultants whom we engage for our projects.

We serve international development organizations, national governments, energy utilities, private and public corporations, project developers and investors.

## TECHNOLOGIES

---

Development and implementation of a high-quality power project is a complex process that requires many factors to be taken into account. At Juru, we aim to provide uncompromised support during the whole process and be a technology & engineering partner you can trust. Since our foundation, we have worked on several high-profile international power systems and renewable energy assignments.

We have expertise in the following key technologies:

- Electrical grid systems
- Energy efficiency
- Energy storage systems
- Distributed energy resources (DER)
- Efficient thermal technologies
- Solar photovoltaic power
- Wind power
- Bioenergy
- Small hydropower
- Hybrid systems
- Off-grid systems

For each technology and engineering discipline, we use industry leading, state-of-the-art tools and software packages.

## SERVICES

---

Our staff has strong expertise in broad range of disciplines in the energy sector. We offer our services to project developers, financial institutions, governments and investors, and support them at various stages of project development and implementation. Our core services are the following:

- Engineering Consultancy
- Technical Advisory & Due Diligence
- Civil Engineering
- Environmental Assessment
- Procurement & Contracts
- Economics & Markets
- Capacity Building & Training
